1. **Goals yet to accomplish**
   - ➔ Improve Face Recognition Algorithm
   - ➔ Make a small interface
2. **Accomplishments**
   - ➔ Face Detection
   - ➔ Cut rectangles of the detected face and save it to a .jpg file
   - ➔ Resize the two images to the same so the program can compare them
   - ➔ Face Detection Algorithm
3. **Pictures**
   - ➔ Only accessing the camera

   - ➔ Face Detection

➔ Face Detection

In this last picture we can see that we can take several pictures and them compare them.
